Sprint Reflection #1

Group: Health Informatics 5

User Story	Task	Assigned to	Estimated Effort	Actual effort	Done
Story 1	Defining the requirements	Everyone	4 hours	4 hours each	Yes
	Create the product backlog	Paul & Julian	2 hours	3 hours	Yes
Story 2	Determining the datastructure	Jan & Robin	4 hours	6 hours	Yes
	Determining how to parse the files	Everyone	4 hours	4 hours	Yes

User Stories

Story 1

It should be clear which features our product must have / could have.

Story 2

A user should be able to give the files which should be saved so we can perform operations on the data.

Problems

We had the wrog deadline of the Emergent Architecture Design in our agenda, so we had to plan some extra time to make this. It was finished on time.
